Bilateral Meetings

- Friday 09:00-18:00

Description

The company Stanisic Bio produces spreads made of forest organic mushrooms under the brand name of Forest Secret classified as high-quality premium food. We decided to take forest mushroom as our base since mushrooms are considered to be the healthiest fruits of nature.

We have five different flavors: Porcini spread, Chanterelle spread, Black Trumpet spread, Morel spread and Black Truffle spread.

We obtain our ingredients from certified companies whose purchase stations are located in the mountain regions of Serbia. Forest mushrooms cannot be grown in artificial conditions and can grow only in natural and organic environment.

Our products are Vegan, Gluten FREE, High Protein, Low Calories and Suitable for Diabetics (Sugar FREE).

We export our products to United States, European Union and Montenegro.

We are supported by USAID organization in the Competitive Economy project, which lasts for 4 years and aims to strengthen the Serbian economy.
